## About

One way to reduce compressor weight is to obtain a high pressure ratio per stage, thereby reducing the number of stages. As a consequence, several single-stage fans have been designed to produce stage pressure ratios ranging from 1.9 to 2.2. Rotor 18 is one of those fans with a pressure ratio of 1.925.

### Useful documents

- [downloadable models](#) (Git project)
  - NASA technical report (.pdf)
  - geometrical parameters file (.csv), usable as input of OpenMCAD<sup>[2]</sup> to generate reference blade models.

## Reference blade

The **reference blade** is defined with multiple-circular arc profiles<sup>[3]</sup> given in the original NASA report<sup>[1]</sup>. Corresponding models are computed with the open-source code OpenMCAD<sup>[2]</sup>.

## Geometry

The geometry of rotor 18 is described in the original NASA report by the following tables. The length are in centimeters and the angles in degrees.

TABLE IV. - BLADE GEOMETRY FOR ROTOR 18

| RP  | PERCENT RADII |        |        | BLADE ANGLES |       |        | DELTA [NC | CONE ANGLE |

## Aerodynamic design

|                  | unit    | value |
|------------------|---------|-------|
| pressure ratio   | [-]     | 1.925 |
| mass flow        | [kg/s]  | 29.5  |
| tip speed        | [m/s]   | 422   |
| tip solidity     | [-]     | 1.7   |
| aspect ratio     | [-]     | 2.6   |
| number of blades | [-]     | 56    |
| rotative speed   | [rad/s] | 1686  |

## Material properties

The original material of the rotor 18 is not defined in the NASA report. A generic titanium Ti-6Al-4V is considered:

|                 | unit                 | value     |
|-----------------|----------------------|-----------|
| alloy           | [-]                  | Ti-6Al-4V |
| Young's modulus | [GPa]                | 108       |
| density         | [kg/m <sup>3</sup> ] | 4400      |
| Poisson's ratio | [-]                  | 0.34      |
| yield stress    | [GPa]                | 0.824     |

## CAD model

The CAD model is computed with the open source code OpenMCAD<sup>[2]</sup>.

pressure side

suction side

## Natural frequencies

First three natural frequencies (with clamped root) for the mesh computed with OpenMCAD<sup>[2]</sup>:

| Mode | Type | Natural angular frequency (rad/sec) | Natural frequency (Hz) |
|------|------|-------------------------------------|------------------------|
| 1    | 1B   | 2023.14                             | 321.992                |
| 2    | 2B   | 6631.02                             | 1055.36                |
| 3    | 1T   | 10297.70                            | 1638.93                |

## Initial blade

The **initial blade** is defined with in-house LAVA parameters<sup>[4]</sup> computed from the reference blade CAD model. The initial blade is usually used as starting point for an optimization process. Its geometry is

similar to the one of the reference blade.

## Natural frequencies

First three natural frequencies (with clamped root)

- from the whole mesh:

| Mode | Type | Natural angular frequency (rad/sec) | Natural frequency (Hz) |
|------|------|-------------------------------------|------------------------|
| 1    | 1B   | 2018.44                             | 321.244                |
| 2    | 2B   | 6628.45                             | 1054.95                |
| 3    | 1T   | 10299.84                            | 1639.27                |

- from the reduced order model:

| Mode | Type | Natural angular frequency (rad/sec) | Natural frequency (Hz) |
|------|------|-------------------------------------|------------------------|
| 1    | 1B   | 2018.52                             | 321.258                |
| 2    | 2B   | 6631.02                             | 1055.36                |
| 3    | 1T   | 10304.68                            | 1640.04                |

## À propos

Une façon de réduire le poids d'un compresseur est d'atteindre un rapport de pression élevé par étage, ce qui permet de réduire le nombre d'étages de ce compresseur. Par conséquent, plusieurs soufflantes à un étage ont été conçus pour produire des rapports de pression par étage allant de 1,9 à 2,2. Le rotor 18 est donc une de ces soufflantes et possède un taux de compression de 1,925.

| masse volumique        | [kg/m <sup>3</sup> ] | 4400      |
| coefficient de Poisson | [-]                  | 0,34      |
| limite élastique       | [GPa]                | 0,824     |

## Modèle CAO

Le modèle CAO est obtenu avec OpenMCAD<sup>[2]</sup>.

intrados

extrados

## Fréquences propres

Fréquences des trois premiers modes (noeuds du pied d'aube encastrés) pour le maillage obtenu avec OpenMCAD<sup>[2]</sup> :

| Mode | Type | Pulsation propre (rad/sec) | Fréquence propre (Hz) |
|------|------|----------------------------|-----------------------|
| 1    | 1F   | 2023,14                    | 321,992               |
| 2    | 2F   | 6631,02                    | 1055,36               |
| 3    | 1T   | 10297,70                   | 1638,93               |

## Aube initiale

L'**aube initiale** est définie par des paramètres spécifiques au LAVA<sup>[4]</sup> obtenus à partir du modèle CAO de

l'aube de référence. L'aube initiale est classiquement utilisée comme point de départ dans le cadre de procédures d'optimisation; sa géométrie est similaire à celle de l'aube de référence.

## Fréquences propres

Fréquences des trois premiers modes (noeuds du pied d'aube encastrés),

- pour le maillage complet :

| Mode | Type | Pulsation propre (rad/sec) | Fréquence propre (Hz) |
|------|------|----------------------------|-----------------------|
| 1    | 1F   | 2018,44                    | 321,244               |
| 2    | 2F   | 6628,45                    | 1054,95               |
| 3    | 1T   | 10299,84                   | 1639,27               |

- pour le modèle réduit :

| Mode | Type | Pulsation propre (rad/sec) | Fréquence propre (Hz) |
|------|------|----------------------------|-----------------------|
| 1    | 1F   | 2018,52                    | 321,258               |
| 2    | 2F   | 6631,02                    | 1055,36               |
| 3    | 1T   | 10304,68                   | 1640,04               |
