About

Rotor 38 is part of a research program to study a advanced-core compressor design with a high compression ratio (20:1). It is therefore the fourth stage rotor of this eight stage transonic compressor. Of these eight stages, the first four have been designed and tested : rotors 35, 36, 37 and 38. For more information, here is a link to [a report from NASA](#).

Reference blade

The **reference blade** is defined with multiple-circular arc profiles^[3] given in the original NASA report^[1].

Corresponding models are computed with the open-source code OpenMCAD^[2].

Geometry

The geometry of rotor 38 is described in the [original NASA report](#) by the following tables. The length are in centimeters and the angles in degrees.

À propos

Le rotor 38 appartient à un programme de recherche visant à étudier une conception de compresseur possédant un grand taux de compression (20:1). Il est donc le rotor du quatrième étage de ce compresseur transsonique de huit étages. Parmi ces huit étages, les quatre premiers ont été conçus et testés, ils correspondent aux rotors 35, 36, 37 et 38. Pour plus d'information, voici un lien vers [un rapport de la NASA](#).
