About

Compressor 74A is part of a research program to study fans and compressors for advanced airbreathing engines to assess and improve the technology needed for high pressure ratio, good efficiency, and adequate stall margin in as few stages as possible. This compressor consists of inlet guide vanes and five stages, and it is designed for a 9.271 pressure ratio. Rotor 74A3 is the rotor of the third stage of this compressor.

Reference blade

The **reference blade** is defined with multiple-circular arc profiles^[3] given in the original NASA report^[1]. Corresponding models are computed with the open-source code OpenMCAD^[2].

Geometry

The geometry of rotor 74A3 is described in the original NASA report by the following tables. The length are in centimeters and the angles in degrees.

À propos

Le compresseur 74A fait partie d'un programme de recherche visant à étudier les compresseurs pour les moteurs avancés afin d'évaluer et d'améliorer la technologie nécessaire pour obtenir un rapport de pression élevé, un bon rendement et une marge de décrochage adéquate avec le moins d'étage possible. Ce compresseur est composé d'aubes directrices en entrée et de 5 étages. Il est conçu pour un rapport de pression de 9,271. Le rotor 74A3 est le rotor au troisième étage de ce compresseur.
